# VOLUNTEERING ACTIVITY PARTICIPATION

On the 29th of September 2021 the ALNUS Team participated in a volunteering activity organized by the project LIFE FLUVIAL (<https://www.lifefluvial.eu/pt/noticias/>) (LIFE16 NAT/ES/000771) in the Paisagem Protegida das Lagoas de Bertandos e São Pedro de Arcos in the river Lima basin (North Portugal). This activity aimed to remove the exotic invasive plants occurring in the riparian corridor, allowing the recovery of the natural vegetation in alder floodplain forests.
